

SW1010 10" 100 Watt Powered Subwoofer

The SW1010 powered subwoofer was created to meet the needs of the demanding audiophile while delivering the dramatic Low Frequency Effects (LFEs) that are essential to any complete home theater. It includes an Active Compression Circuitry that can deliver teeth rattling low frequencies without break up or coloration. This technology evaluates the input signal and protects against harmful spikes to avoid clipping. The SW1010 delivers 100 watts of amplification which includes a redesigned on-board amplification system.

SW1010 Specifications

Woofer	10"
Amplifier Power	100 Watts
Frequency Response \pm 3dB	33Hz-120Hz
Tuning	Passive Radiator
Input	High/Line
Output	Line
Phase Switch	0° /180°
Level Control	Variable
Auto Turn on/off	Yes
Low Pass Slope	24dB
Subsonic Filter	18db@30Hz
Dimensions (HxWxD)	17-3/4" x 14" x 17-1/2"

SW1212 12" 150 Watt Subwoofer with Passive Radiator

The SW1212 powered subwoofer was created to meet the needs of the demanding audiophile while delivering the dramatic Low Frequency Effects (LFEs) that are essential to any complete home theater. It includes an Active Compression Circuitry that can deliver teeth rattling low frequencies without break up or coloration. This technology evaluates the input signal and protects against harmful spikes to avoid clipping. The SW1212 delivers 130 watts of amplification which includes a redesigned on-board amplification system.

SW1212 Specifications

Woofer	12"
Amplifier Power	150 Watts
Frequency Response \pm 3dB	27Hz-120Hz
Tuning	Passive Radiator
Input	High/Line
Output	Line/High
Phase Switch	0° /180°
Level Control	Variable
Auto Turn on/off	Yes
Low Pass Slope	24dB
Subsonic Filter	18db@25Hz
Dimensions (HxWxD)	18" x 15" x 19-1/2"
